PROJECTS

- **SIMATA Mobile**
  - SIMATA is a thesis management app for Fakultas MIPA, Universitas Syiah Kuala. This app is adapted from its website
  - Made using Flutter clean architecture for its code structure, API for connecting to the database, Firebase Cloud Messaging for push notification, and Bloc for state management
  - Developed with refactoring method, all of functionalities from its website is implemented to the app
- **Ditonton**
  - Ditonton is a mobile app that provides information about latest movies and tv series with TheMoviesDB's API. This app is made due to submission for Flutter expert class in Dicoding
  - With this submission, we as developers have to continue the existing project for adding up more features. This project also simulates how a new developer get into a project that already been developed before, like how to adapted to the code, to follow the project flows, etc
  - Made using Flutter, Firebase, and Sqflite
  - Link Github: https://github.com/nafladiva/ditonton-dicoding-MFDE
- **SIREMA**
  - SIREMA (Sistem Reservasi Asrama) is a website for managing hostel reservations in Puslatbang KHAN LAN RI. This web also contains function for reserving facility rooms, such as theater room, classroom, etc
  - Made using Laravel and MySQL
  - Collaborated with Puslatbang KHAN's employees for gathering all the application requirements

ADDITIONAL SKILLS

- **Language** : Indonesia (*Native*), English (*Proficient*)
- **Microsoft Office**: Proficient in Microsoft Word, Excel and PowerPoint
- **Design:** Proficient in Figma, Adobe XD and Adobe Photoshop
